325 Fitness Solutions: Diversity, Inclusion, and Equity with Kia Williams

Workshop: AQ, GE, MB, PT, S

Inclusion and Diversity are major factors in the success or detriment of a business, industry, and/or society. Stakeholders at any level of involvement "should" feel like they are welcomed, appreciated, supported, and recognized. However, too many times, people experience poor representation, poor equity, poor access, and poor protection due to lack of inclusion and diversity in services and organizations. We will discuss some issues with inclusion and diversity that plague the fitness industry and how these issues impact people. We will also develop solutions and variations of solutions to help inform ourselves and others and to deliver better fitness services to our consumers. Diversity and Inclusion are critical in the workplace. There is no better time than now to address the concerns and issues that may be affecting employees, consumers, and business potential.

Workshop Objectives:

- Define diversity and inclusion and why these are imperative in the fitness industry
- Identify key components of diversity and inclusive practices for successful employee and consumer engagement and retention
- Explore and identify various solutions for supporting diversity and inclusion in your business practices
- Examine potential goals and challenges with accessibility in group fitness community building.
- Develop effective strategies for proposing in-person and online engagement and consumer loyalty.

421 YogaFit® The Language of Yoga with Kim Gray

Workshop: GE, MB

Words can be magical! Language impacts not just what we do but HOW we do what we do. This fact becomes critically important when teaching yoga but could also have impact when working directly with clients who are struggling to create real change in their lives. Using words that offer choice and encourage process-oriented movements as opposed to goal oriented movements changes the entire path that we take to get there. One path is a forgone conclusion and is the path of OLD habits, patterns and reinforcement of pre-programmed implicit movement patterns. That's the "do what I say because I told you to" path of language. Come explore the creative and intuitive path that offers our students choices based on feeling, breathing, and staying in the present moment. This kind of language is the DIFFERENCE maker when determining if a class is one that is healing or not! Discover what kind of language creates this quantum new potential in our lives, and how it impacts the brain as well as the nervous system. This session includes discussion and a language-focused yoga practice.

426 Breath: The Secret to Improving Posture, Movement and Performance with Jenice Mattek

Workshop: GE, MB, S

Clients often present with chronic tightness, discomfort, and the inability to perform at the level they need or want. Suboptimal breathing strategies are the most common finding underlying postural alterations, limited ROM, decreased strength, as well as chronic tension and discomfort. Strengthening approaches that omit breath training will perpetuate rather than help these issues. During this session, you'll discover how breathing directly impacts posture, ROM, and stability. Additionally, you'll discover real-world strategies for seamlessly integrating breathing into your client's warm-ups, strengthening, and cool-down sessions. You will not look at breathing the same after this session.

Learning Objectives

After attending this session, participants will be able to:

- describe how three-dimensional breathing impacts posture, movement, and stability
- demonstrate how to assess for common suboptimal strategies and utilize the most effective strategy to improve three-dimensional breathing
- integrate breathing into a comprehensive training program to improve posture, range of motion, and performance

435 Got Older Clients with Tight Hip Flexors and Weak Glutes? Do These 3 Things! with Dr. Evan Osar

Workshop: GE, MB, S

You've heard it before - your client's back, hip, or knee problems are coming from tight hip flexors and weak glutes. Yet despite all the hip flexor stretching and glute strengthening, there has been no decrease in the incidence of back, hip, or knee problems. In fact, these problems are on the rise. Unfortunately, common industry approaches often perpetuate rather than help these issues. During this dynamic and interactive session, you'll discover the 3 most common underlying and underappreciated factors contributing to chronic hip flexor tightness and glute weakness. You will discover 3 simple assessments and a 3-part, super easy-to-implement corrective exercise strategy to improve hip mobility and stability. You'll leave this session understanding how to program corrective exercises as well strengthening progressions and regressions for clients of all levels. You'll not look at glute training the same after attending this session.

Learning Objectives

After attending this session, participants will be able to:

- describe the underlying causes of decreased hip mobility and compensated stability;
- demonstrate how to use the most effective assessments and corrective exercises to improve mobility and stability of the hip complex;
- apply this knowledge to create an integrated strength training program for clients with hip mobility and stability issues.

444 Connecting the Core and Pelvic Floor with Jenice Mattek

Workshop: GE, MB, S

Millions of individuals are having 'routine' surgeries of the abdomen and pelvis including C-sections, hysterectomies, GI and gall bladder, and hernias. While often not discussed, chronic tightness and weakness are a common side effect of these minimally invasive surgeries. As a fitness professional, you are often the first person these individuals seek out to return to exercise and address post-surgical tightness and weakness. In this interactive session, you will learn what really happens to the body after surgery, how to identify common post-surgical compensations, and how to safely train these individuals. Additionally, you will discover how to progress and program for individuals who have just been cleared to return to exercise as well as those who have had surgery recently as well as 10, 20, or 30 years ago.

After attending this session, participants will:

- discover how surgery impacts posture, movement, and muscle function;
- be able to assess and identify exercises to address underlying causes of tightness and weakness in the post-surgical client;
- be able to create a training program that addresses the needs of the post-surgical client.

445 Power to Function with Lori Sherlock

Workshop: AQ

When most people think of the word power in relation to performance what is commonly pictured is a well-tuned athlete with a 2.5 foot vertical jump. Though the importance of power production for an athlete is paramount for many sports, it is just as important for the everyday Joe when performing activities related to daily living. In fact, power is the strongest predictor of fall risk and functional decline. Its level of importance is often overlooked while it's inclusion in fitness is commonly absent. So what exactly is power and how can it be incorporated into training? In this workshop we will explore just that!

Group 12: Sunday 12/13/20

450 B. Hip-Hop with Kia Williams

Workshop: GE

B.R.A.V.E. Hip Hop, more popularly known as “B. Hip ★ Hop.”

B.R.A.V.E. is an acronym for Belong to the Rhythm and Align with your most Valiant and Electric energy.

This is a music-driven, beat-based, low impact, cardiovascular fitness experience. The goal is for participants to let loose, move their body, and tap into their personal BRAVE space. The personal BRAVE space is where we all protect and keep our most authentic and electrifying selves. It is the portal we want to enter during this group fitness class experience, where we feel our most valiant, fierce, radiant, free, strong, and accepted. This dance-inspired, rhythmic group fitness class fuses new and throwbacks of the greatest dance moves from Hip Hop, including popping, locking, breaking, grooving, strutting, voguing, line dancing, and twerking. There is the freedom to bravely incorporate other traditional dance styles and modalities to make for an exhilarating cardio dance experience. Bring your own style, personality, and bravery. Be B.R.A.V.E.! No prior dance experience necessary.

Workshop Objectives:

- Introduce and understand the history of Hip Hop culture, dance, and music
- Learn key components of safety through dynamic movement patterns
- Exercise effective and inclusive cueing language
- Develop an understanding of the application of exercise physiology in group fitness
- Apply the B.R.A.V.E. sequencing structure for a unique dance class experience

453 Exercise Solutions for Common Knee Problems with Dr. Evan Osar & Robert Linkul

Workshop: GE, MB, S

Knee osteoarthritis is one of the most debilitating musculoskeletal conditions. It can limit an individual's ability to walk, run, and participate in many activities of life and dramatically decreases their likelihood of living a full productive life. Unfortunately, many individuals are not given great options outside of rest, medications, and surgery. Fortunately, as a Fitness Professional, you are in the best position to be a solution for your clients. In this interactive session, you'll discover why so many older adults have knee osteoarthritis. You'll also learn the most effective corrective exercises for improving your client's knee and foot function. Additionally, you'll discover how to properly progress and program strength training for your clients with knee osteoarthritis and joint replacements.

Learning objectives

Participants will discover:

- the most common habits that contribute to the development of knee issues including osteoarthritis and joint replacements;
- why applying the principles - alignment, breathing, and control - provides both short and long-term changes in knee function

- how to perform key assessments - both virtual and in person - to determine their client's range of motion and knee stability;
- how to use the most effective corrective exercises to improve functional outcomes and reduce injuries;
- the most effective resistance training exercises to improve stability, strength, and balance;
- program corrective and resistance exercises into an overall program for improved results.

454 Task Oriented Training with Lori Sherlock

Workshop: AQ

Movement is a result of many systems interacting to achieve a goal or task. Tasks, neurologically speaking, are performed differently than exercises broken down into basic movement patterns and therefore, can require additional training for successful completion. Simply put, you learn what you practice and motor learning is specific to the task. Learn how to use task oriented training to create movement challenges that will improve the quality of life of your participants. From seniors to athletes, this training technique can empower your population!
